EXPERIENCE

FULL STACK DEVELOPER

06/2025 - Present

CREATIVEANS ↗

- Spearhead the end-to-end maintenance and feature development of a SaaS product, utilizing Next.js and Tailwind CSS for the frontend and Go for high-performance backend services.
- Translate high-fidelity Figma designs into pixel-perfect UIs, ensuring 100% design accuracy and responsive layouts across devices.
- Enhance user engagement by implementing complex, high-performance web animations using GSAP, creating a seamless and interactive user experience.
- Enforce Clean Code principles and modular architecture, resulting in improved code maintainability and reduced technical debt for the engineering team.

SOFTWARE ENGINEER

09/2024 - 06/2025

ALTURIAN ↗

- Engineered a robust retail management system using Angular and Tailwind CSS, streamlining store operations and inventory tracking.
- Collaborated cross-functionally with designers and backend developers to integrate RESTful APIs (Laravel), delivering key client-requested features ahead of schedule.
- Championed code quality initiatives by conducting rigorous code reviews and enforcing best practices, significantly reducing post-release bugs.
- Boosted frontend performance by refactoring legacy CSS and removing redundant styles, resulting in a cleaner codebase and faster load times.

SOFTWARE ENGINEER

08/2023 - 08/2024

BENS MULTI ↗

- Architected scalable web applications using Next.js with Static Site Generation (SSG), successfully handling high-traffic pages with minimal latency.
- Optimized API performance by debugging and refactoring Laravel-based endpoints, achieving a 25% reduction in query response times.
- Accelerated page load speeds by 20% through efficient state management implementation (Redux/Zustand) and frontend optimizations.
- Established automated CI/CD pipelines using GitHub Actions, streamlining testing and deployment processes to ensure smooth production releases.
- Ensured cross-browser compatibility across Chrome, Firefox, and Safari, delivering a consistent user experience for all clients.

FREELANCE WEB/MOBILE DEV

02/2022 - 07/2023

SELF-EMPLOYED

- Delivered end-to-end web and mobile solutions for diverse clients, utilizing React, Next.js, and Flutter to create intuitive and responsive interfaces.
- Designed and implemented RESTful APIs using Express.js and Laravel, ensuring secure and efficient data communication.
- Managed and optimized PostgreSQL databases, writing complex queries to handle large datasets and improve application performance.

LABORATORY SUPERVISOR

01/2020 - 08/2022

ANDI DJEMMA UNIVERSITY

- Mentored and instructed undergraduate students in fundamental programming concepts (C++ and JavaScript), fostering a strong technical foundation for future engineers.

- Managed laboratory operations and inventory procurement, ensuring the availability of essential hardware and software resources for practical sessions.
- Supervised and quality-assured teaching modules/curriculum, ensuring alignment with academic standards and effective learning outcomes for practitioners.

EDUCATION

INFORMATICS ENGINEER

ANDI DJEMMA UNIVERSITY - BACHELORS

GPA: 3.82

09/2016 - 11/2020

CERTIFICATES

Front End Developer (React)

HACKERRANK

Web Developer Bootcamp 2023

UDEMY

Offline Training Back-End Developer

IDCAMP X KADIN

Make an Apps With React
